

Safety Data Sheet

CGC DISINFECTANT™

1. Chemical Product and Company Identification

Product Identifier:

CGC DISINFECTANT™ Electro-Chemically Activated solution of sodium chloride (0.9% or less)

Means of Identification: DIN: 02511967

Chemical Family

Diluted Mixture of Oxychlorine Compounds

CAS #: None (Mixture)

Recommended Use: Antimicrobial agent

Restrictions on Use, Not available

Manufacturer: Plains ECA Solutions Inc.

Address:

General Delivery

Decker Manitoba

ROM OKO

Telephone Number

204-581-1309

2. Hazard Identification

Hazard Classification: Not available.

2.1 Dangerous Components of the Product Toxicity:

2.1.1. Identification: none

2.1.2. Danger symbol: none

2.1.3. Toxicity: none determined

Label elements:

Signal word: none

Hazard statement(s): none

Precautionary statement(s): Under normal use conditions the likelihood of any adverse health effect is low. **Hazards Not Otherwise Classified:** Not available.

Percentage of Ingredients with Unknown Toxicity: Not available.

3. Composition/Information on Ingredients

99.500% Water, 0.450% sodium chloride, 0.004% other
0.046% oxidizer as hypochlorous acid/sodium hypochlorite

4. First-aid measures

Skin contact: Where irritation appears, wash area with water.

Eye contact: If irritated, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Seek medical attention if irritation continues

Ingestion: Drink water to flush through and dilute.

Inhalation: If breathing problems develop, move into fresh air. If dizziness or nausea occurs seek immediate medical attention. **Most important symptoms and effects (acute or delayed):** Not available.

Immediate medical attention and special treatment, if necessary: Not available.

5. Fire-fighting measures

Not flammable or explosive as the product consists of 99.50% water. In a fire, cool containers to prevent release of free chlorine. **Suitable and unsuitable extinguishing**

Media: Not available.

Hazardous combustion products: Not available.

Special protective equipment and precautions for fire-fighters: Not available.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures: Not available.

Methods and materials for containment and cleaning up: Not available.

Spills, Leaks, Effluent Handling Procedures: CGC DISINFECTANT™ is <0.9% sodium chloride (salt) solution and less than 0.05% available chlorine. Some localities allow this to be sent to open storm sewers; however local **environmental regulatory requirements should be followed**. If desired, spills can be washed to sewer with plenty of water or neutralized by sodium sulfite or sodium thiosulfate.

7. Handling and storage

Precautions for safe handling: Not available.

Conditions for safe storage including incompatible materials: Not available.

Keep from freezing

Exposure Controls/Personal Protection

No personal protective equipment is required under normal conditions. The following suggestions should be considered in case of accidental chlorine release due to acidification.

Ventilation: Open air or good room ventilation is normally adequate for the safe use of the product. Avoid breathing any vapours or fumes resulting from acidification ventilation.

Respiratory Protection: In accordance with OSHA regulations (29 CFR 1910.134 and 29 CFR 1910.1000) fogging or spraying applications may require worker respiratory protection,

As: (1) NIOSH/MSHA approved air-purifying - respirators, (2) NIOSH/MSHA approved canister/cartridge facial respirators approved for chlorine/acid vapours.

Eye Protection: Although CGC DISINFECTANT™ is a decontaminant designed not to irritate eyes or skin, good manufacturing/laboratory practice recommends use of chemical safety goggles for all applications involving chemical handling.

Protective Clothing: Although CGC DISINFECTANT™ is a decontaminant designed not to irritate eyes or skin, good manufacturing/laboratory practice recommends that, at a minimum, rubber, neoprene, or other chemically impervious gloves be worn for all applications involving chemical handling.

9. Physical and chemical properties

Physical state: Liquid

Appearance/Colour/Odour: Colourless with Chlorine-Like Odour

Boiling point: 100°C

Melting point//Freezing point Range: Comparable to Water

Specific gravity: 1.02 – 1.06 g/ml

Evaporation rate: Comparable to Water

Solubility in water: Complete

PH: 6.3 – 6.7

Viscosity: (21c) Average: 0.9846mm²/s (cSt)

Viscosity: (41c) Average: 0.6346mm²/s (cSt)

Flash point: Not available

Odour threshold: Not available

Flammability (solid; gas): Not available

Lower flammable/explosive limit & Upper flammable/explosive limit: Not available

Vapour pressure: Not available

Vapour density: Not available

Partition coefficient - n-octanol/water: Not available

Auto-ignition temperature: Not available

Decomposition temperature: Not available

10. Stability and reactivity

Reactivity: Not available.

Chemical Stability: Loses its level of available chlorine at high temperature and under direct sunlight. **Possibility of hazardous reactions:** Not available.

Conditions to Avoid: Avoid accidental or uncontrolled contact of Ultralyte solution with acids and hydrogen peroxide. **Incompatible materials:** Acids and hydrogen peroxide.

Hazardous decomposition products: Not available.

11. Toxicological information

Likely routes of exposure: Inhalation, ingestion, skin and eye contact.

Symptoms related to the physical, chemical and toxicological characteristics: Not available.

Delayed and immediate effects and chronic effects from short-term and long-term exposure:

Under normal use conditions the likelihood of any adverse health effect is low.

Acute Toxicity Estimates:

LD50 of product: undetermined

LC50 of product: undetermined

12. Ecological information

Not available.

13. Disposal considerations

Waste disposal must be in accordance with appropriate provincial and federal regulations.

14. Transport information

This product is not classified as dangerous goods as defined by 49 CFR 172.101 by the U.S. department of transportation

15. Regulatory information

EPA Establishment # 087148-CAN-001

DIN: 02511967

15. Other Information

Date of Preparation: Re-formatted October 01/20

CGC DISINFECTANT™ was developed to be a less hazardous antimicrobial agent than many of those agents now in use.

DISCLAIMER:

This information is based on our current knowledge and is intended to describe the product for the purposes of health and safety requirements only. It should not, therefore, in itself be construed as a guarantee of any specific quality relating to the product.
